Lesson Plan For

Ferrous Metallurgy - I (2022-23)

Department of Metallurgical Engineering

GP Sonepur

Discipline: Metallurgical Engineering

Subject:FerrousMetallurgy-1(TH-04)

Semester:3rd

Total Period allotted: 60

Period per week: 4

NameoftheTeachingFaculty: Bichitra Kumar Sahoo

Session - 14/09/2022 to 22/01/2023

Week	Class No.		Lecture Topics
1	1	Chapter -1: Raw Materials for Iron Making	Introduction about iron making and blast furnace
	2		Raw materials for iron making and their function
	3		Various minerals available in India
	4	Chapter -2:Quality requirements of raw materials	Types of iron ores, composition and characteristics
2	5		Various parameters to evaluate iron ore
	6		Metallurgical coal, difference between coal and coke
	7		Properties of coke required to be used in blast furnace
	8		Various types of flux
3	9		Basicity of slag
	10		Evaluation of flux
	11	Chapter-3:Burden Preparation	Required physical and chemical properties of b/f burden
	12		-do-
4	13		Agglomeration and its type
	14		Working principle of Sintering machine
	15		Mechanism and advantages of sintering
	16		Pelletising, steps involved in pelletisation

Jan 19, 2024, 18,20

5	17		Machanism and anaration of
5	17		Mechanism and operation of pelletising process
	18	Chapter-4:Blast Furnace	Function of coke in blast furnace
	19	Fuel	
			Quality requirement of coke for b/f use
	20		Preparation of coke in coke oven
6	21		Different types of coke oven
	22		Auxiliary fuels for blast furnace
	23		Various factors affecting fuel
			consumption in blast furnace
	24		Tutorial Class
7	25	Chapter-5:Blast furnace	Blowing in process in b/f
	26	Operation	Blowing out, banking and
			Tapping
	27		Fanning and Back draughting
	28		Disposal of slags, Slags
			granulation & their utilization
			grandiation & then attrization
8	29	Chapter-6:Blast furnace	Refractory lining in various part
		Accessories	of blast furnace
	30		Cooling arrangements in b/f
	31		Cast house, drilling and mudgun
			machine
	32		Tuyere arrangements and RMHS
9	33		Charging system in b/f
	34		Blower, boiler and pumps
	35		Design and operation of stove
	36		Gas Cleaning system
10	37	Chapter-7: Blast Furnace	Hanging and scaffolding
- •	38	irregularities and	Slip and Chilled herth
	39	Remedies	Pillaring and Herth breakout
	40		Choking of gas line and Flooding
			and coke ejection through tap
			hole
11	41		Leaking tuyeres tap holes and
			coolers
			And Channelling
	42	Chapter-8: Chemistry of	Blast furnace Profile
	43	Blast Furnace operation	-do-
	44		Direct and indirect reaction
12	45		Reduction reactions of iron oxide
	46		C-CO-CO ₂ reaction
	47		Reaction in different parts of
			blast furnace
	48		-do-
13	49		-do- Various zones exist in blast
			furnace
	50		
			Slag metal reactions

	51	Chapter- 9:Modern	Bell less charging system its
		Development of Blast furnace operation	advantages
	52		HTP operation
14	53		Humidification and oxygen enrichment
	54		External de-siliconisation and desulphurisation
	55		Revision Class for Chapter 1,2 &3
	56		Revision Class for Chapter 4,5&6
15	57		Revision Class for Chapter 7,8&9
	58		Class test
	59		Important question discussion
	60		Important question discussion

Bichitra Kumar Sahor
